

VPN Setup on Windows 7

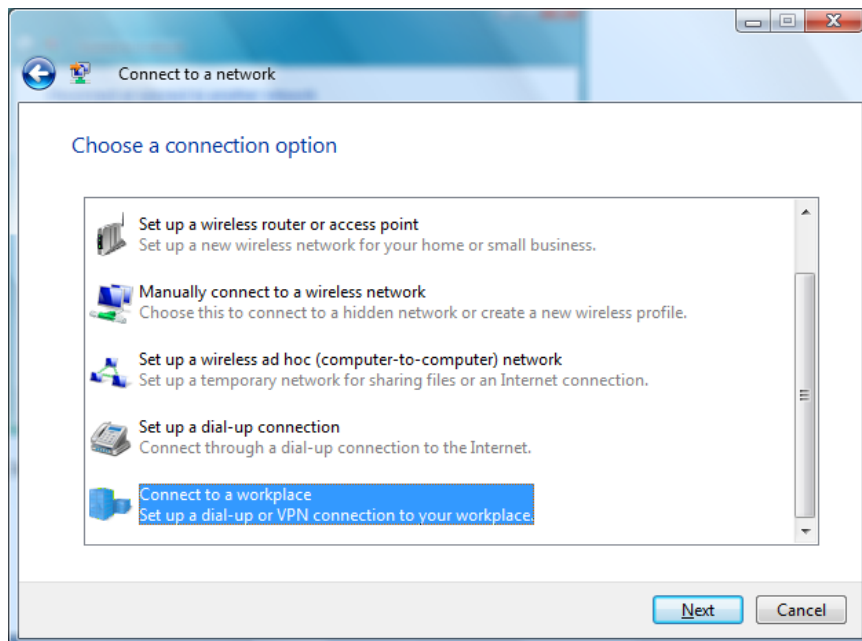

Click on the “Windows” Icon and select “Control Panel”

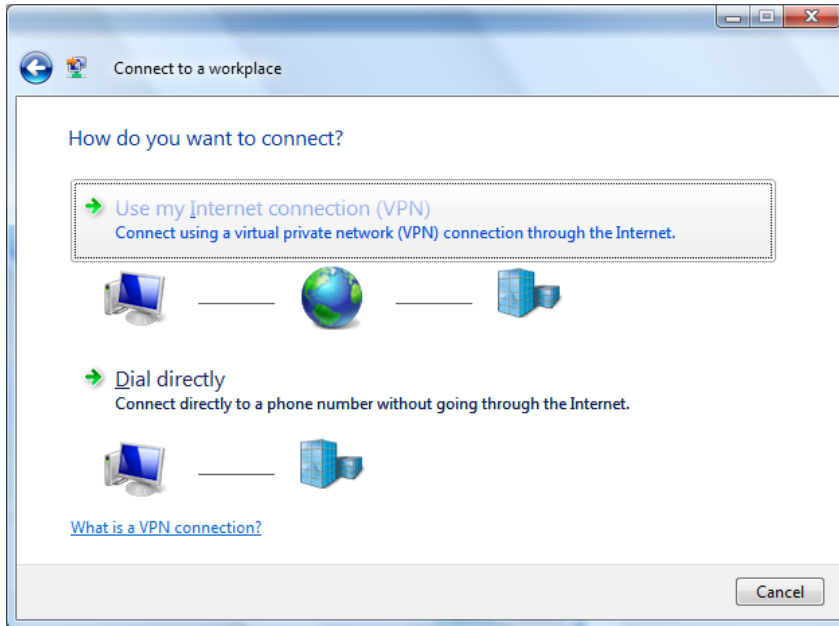

Choose “View Network status and tasks” under the Network and Internet section

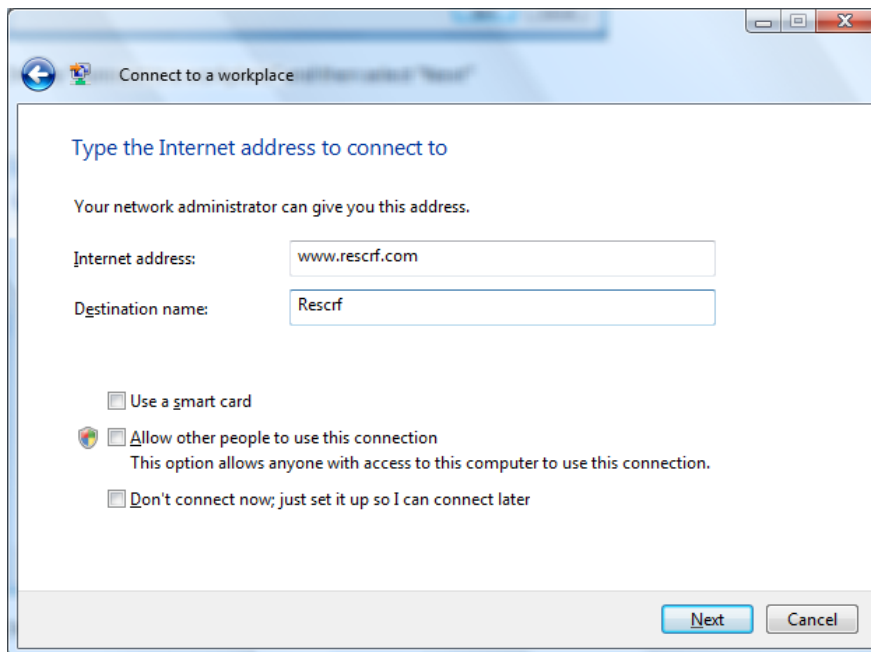

Select "Set up a new connection or network"

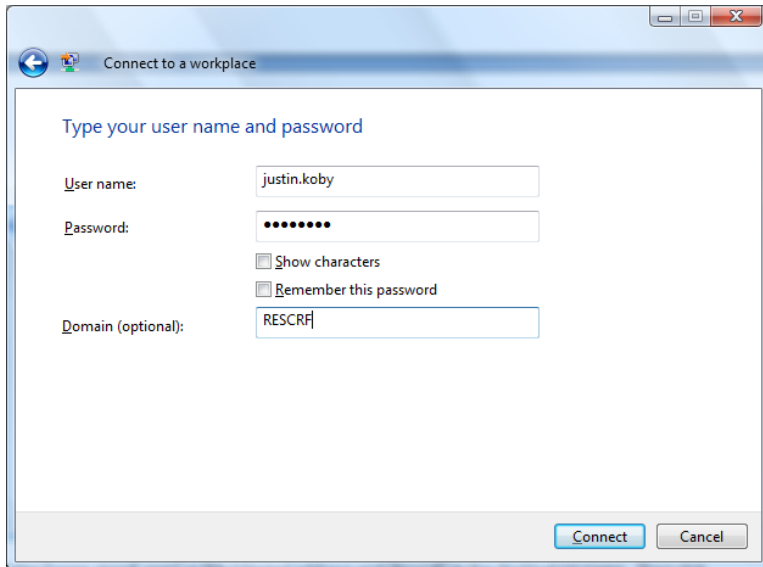

Choose "Connect to a workplace" and then select "Next"

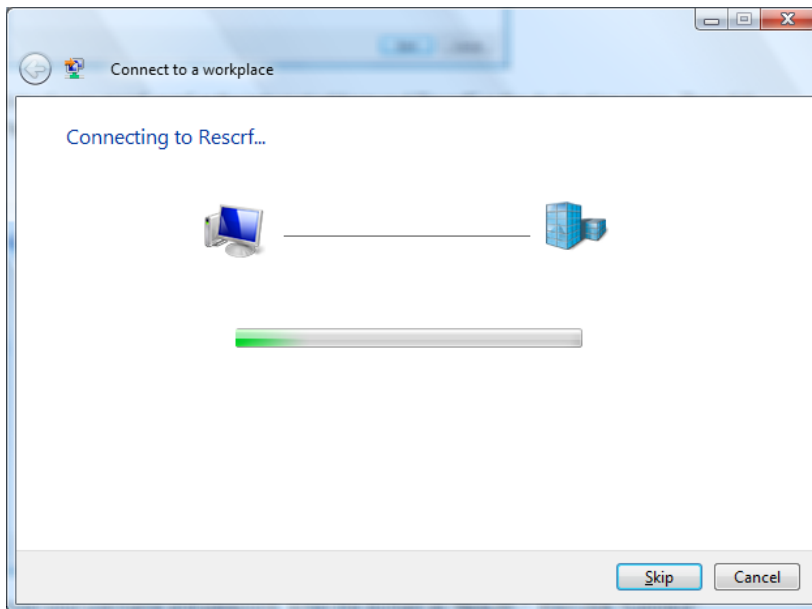

Choose “Use my Internet Connection (VPN)”

Enter “www.rescrf.com” as the Internet address and “Rescrf” as the destination name. Then click “Next”

Enter your username and password. Enter the domain as "RESCRF." Then click "Connect"

The connection should now connect and authenticate you.
